By law, nearly 1,000 TV stations must move frequencies to make room for wireless services now through 2020.

For antenna users, when your channels move to new frequencies you must rescan your TV to keep watching your local stations. Rescanning is when your TV finds all the available channels in your area. This process is simple and requires no new equipment or services.

**Make a plan to rescan!** Find out which stations are moving frequencies and when at TVAnswers.org and follow @TVAnswers for the latest updates.
